

**TAKE
ACTION**

**TO STOP
LUNG CANCER**

**Low Cost
Lung Cancer CT Screening**

NOW AVAILABLE AT
DAVIS MEMORIAL HOSPITAL

physician information

Lung cancer is the leading cause of cancer death nationally, with an average of 228,000 new cases and nearly 160,000 deaths annually. That represents more than a quarter of all cancer deaths each year, more than breast, prostate and colon cancers combined.

The American Cancer Society reports that West Virginia has the highest incidence of lung cancer in the United States, so the issue is critically important in our state and for the Cancer Care Center at Davis Memorial Hospital. While the national average for new lung cancer cases is 73 people in 100,000, that figure rises to 113 cases per 100,000 in West Virginia.

Davis Memorial Hospital is determined to help bring awareness and access to lung cancer screening to people at high risk by offering a low-cost screening to asymptomatic current and former smokers who meet high-risk criteria. Patients who may be at risk can receive the Lung Cancer Screening close to home, with minimal disruption to their daily routines. Those with positive results can work with medical providers at the Cancer Care Center to outline an appropriate course of treatment.

LDCT lung screening is quick and easy, and results in a minimal amount of radiation exposure.

If you have patients who qualify, you can contact us to schedule an appointment by calling 304.637.3185. between the hours of 8 am and 5 pm, Monday through Friday.

Patients must have an order for a lung cancer screening CT and the guidelines form (see back) in order to schedule the test.

LUNG SCREENING CAN SAVE LIVES!

Davis Memorial Hospital

CT LUNG SCREENING GUIDELINES

All Candidates for CT lung screening should be asymptomatic, have no known metastatic disease, and should not have a diagnosis of lung cancer within the past 5 years.

Patient Name: _____ D.O.B. _____

Patient Phone: _____ Referring Physician: _____

Pack-Years (#pack/day x years) _____ Smoking Status: Current Former, quit _____ years ago

NCCN High-Risk Groups Qualifying for CT Lung Screening

GROUP 1

- 55 – 74 years old
- Are currently a smoker or have quit within the past 15 years
- Have smoked at least a pack of cigarettes a day for 30+ years

GROUP 2

- 50 – 74 years old
- Have smoked at least a pack of cigarettes a day for 20+ years
- Have one additional lung cancer risk factor, not to include secondhand smoke exposure

NCCN Lung Cancer Risk Factors for Group 2 Qualification (one required)

1. FAMILY HISTORY OF LUNG CANCER

- Mother
- Father
- Sibling
- Child

2. PERSONAL HISTORY OF CHRONIC LUNG DISEASE

- COPD
- Emphysema
- Chronic bronchitis
- Pulmonary fibrosis

3. OCCUPATIONAL EXPOSURE TO 8 LUNG CARCINOGENS

- Arsenic
- Asbestos
- Beryllium
- Cadmium
- Chromium
- Diesel Fumes
- Nickel
- Silica

4. RADON EXPOSURE

- Documented Residential
- Occupational (Mining)

5. PERSONAL HISTORY OF CANCER (excluding known metastatic disease)

- Lung Cancer
- Lymphoma
- Head & Neck
- Esophageal
- Bladder
- Cervix
- Colon
- Kidney
- Pancreas
- Stomach
- Other smoking related cancer

To schedule your appointment for a lung cancer screening, please fax this form and a physician order to 304.637.3183 or call 304.637.3185.
